

Q) Create a BST using following values.

100, 96, 110, 98, 95, 120, 109, 113, 130, 83.

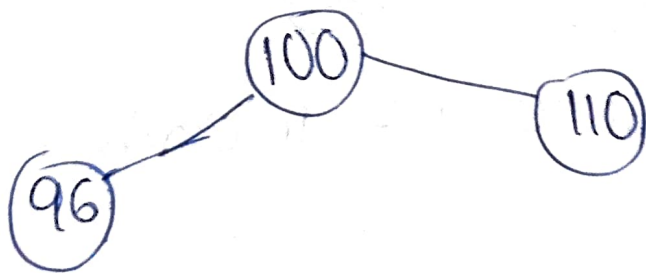

i) The very first value is 100. Hence, it becomes first parent node which is root.

(100)

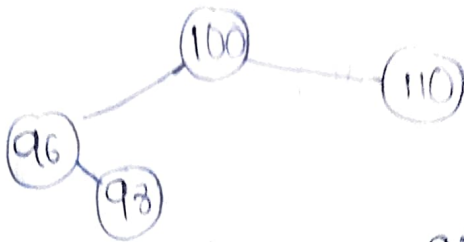

ii) Next value is 96. Since $96 < 100$. it goes towards left of 100

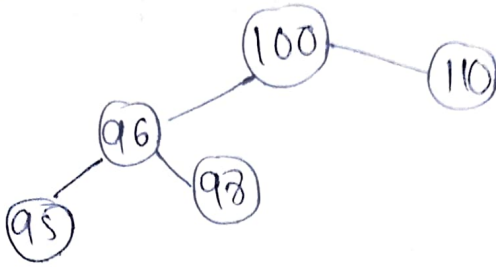

iii) $110 > 100$, $110 > 96$. Hence 110 towards right of 100.

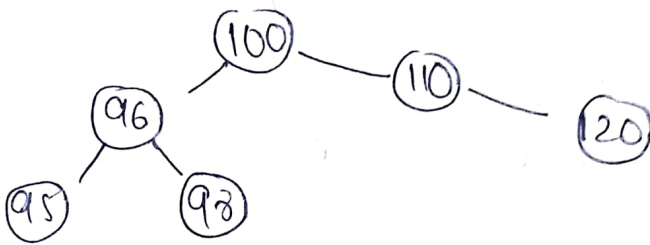

iv) $98 < 100$, $98 < 110$, $98 > 96$. Hence, 98 towards right of 96 and left of 100

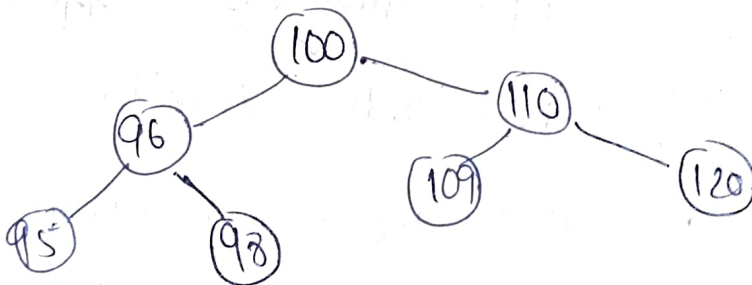

v) $95 < 100$, $95 < 96$. Hence, 95 towards left of 96.

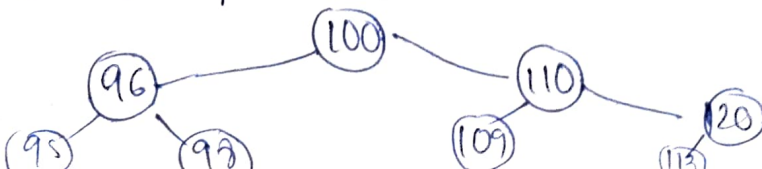

vi) $120 > 100$, $120 > 110$. Hence, 120 towards right of 110.

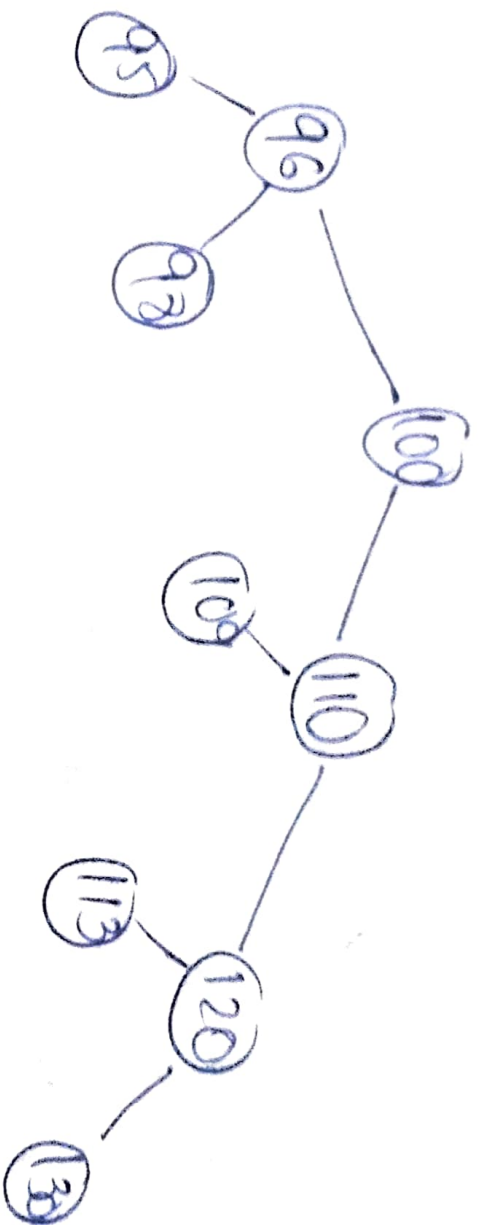

vii) $109 > 100$, $109 < 110$. Hence, 109 towards right of 100 & left of 110.

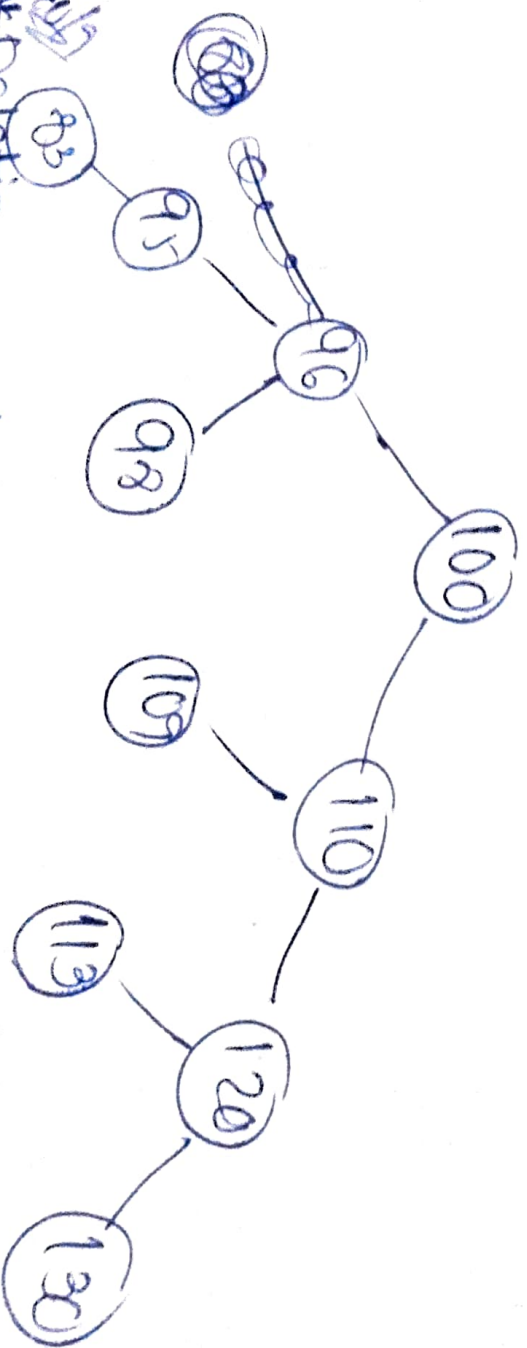

viii) $113 > 100$, $113 > 110$, $113 < 120$. Hence 113 towards left of 120.

ix) $130 < 100$, $130 > 120$. Hence, 130 towards right of 120.

x) $83 < 100$, $83 < 96$, $83 < 95$. Hence, 83 towards left of 96.
