

HW

Q1. Write a C++ code which includes a class student.
Find out the space occupied by object by using
sizeof().

Ans 1: `#include <iostream>`
~~`using namespace std;`~~
~~`int main()`~~ using namespace std;

`{`
`class Student`
`{`
`public:`

`int rollNo;`

`char grade;`

`float marks;`

`};`

`int main()`

```
{  
    Student S1;  
    cout << "Space occupied by student object = "  
        << "size of (S1) << "bytes" << endl;  
    return 0;  
}
```

Output: Space occupied by Student Object = 12 bytes.
